

PRODUCT DATA

AQUARIGHT N-602

Microbes Concentrate

DESCRIPTION AND USE

AQUARIGHT N-602 is a specialty liquid concentrate microbes for biological waste water treatment formulated with selected unique composition of crude enzyme, saccharide, microbes and nutrients fixation. It can be used as microbes starter and as nutrient supplement for microorganism.

Application of **AQUARIGHT N-602** will accelerate microorganism growth and population and potentially give much efficient in nutrient use, finally it would provide better WWTP performance.

It is usefull for aerobic and anaerobic biological WWTP during start up or continually maintenance.

GENERAL SPESIFICATION

Appearance : Brown Liquid
pH (as is) : < 6.0
Spesific gravity : 0.95 – 1.10

TRAEIMENT AND DOSAGE REQUIREMENTS

Mixing Rate:

2,5 – 5 liter **AQUARIGHT N-602** dilute into 200 liters of ready to use. For best result used diluted product 2 – 4 hours after dilutions with mixing/aeration.

Application Rate:

- **Application:** 2,5 – 5,0 kg/100 m³ of biological lagoon.

- **Maintenance:**

Normal dosage is in a range 0,25 – 0,5 % based on BOD load (may be depend on waste water quality).

The point of addition for application is distributed at biological lagoon and for maintenance is at inlet biological lagoon. The optimal dosage should be evaluated on-site.

For best result use **AQUARIGHT N-602** combined with **AQUARIGHT N 820 (microorganism nutrient)**.

PRODUCT BENEFITS

- Biological treatment
- Environment friendly
- Better in terms of performance and operational cost
- Less odor issue, Easier and safe in handling

Every endeavor has been made to ensure that the information contained in this leaflet is reliable but we cannot accept liability for any loss, injury or damage which may result from its use. Data given in this Material Safety Data Sheet are solely for guidance in safe handling and use of the product(s) by customers; they do not form part of any specification.
